

# ENVIRONMENTAL POLICY

Proton Engineering

**Proton Engineering, together with its employees, customers and suppliers, shall be a conscious company that strives to continuously improve its environmental performance and prevent pollution, in order to achieve an environmentally sustainable business.**

- ❖ We will fulfil all legal and other requirements imposed on our activities and strive to exceed them.
- ❖ We will always consider the environmental impact of our investments.
- ❖ We require our suppliers and other business partners to adhere to the European Commission's 2030 climate goals and the UN's ten global principles.
- ❖ We will prevent pollution of air, soil and water by reducing the environmental impact of what we do where it is considered sustainable and ensure that we comply with noise emission benchmarks.
- ❖ We will strive to work according to GHG with targets to use only renewable energy sources and actively work to reduce our energy consumption and actively work to phase out fossil fuels.
- ❖ We will constantly optimise the use of resources within the company, by continuously measuring and improving process efficiency, material and scrap consumption, energy and water consumption.
- ❖ We will reduce our carbon footprint and thus contribute to the goals of the Paris Agreement by carrying out climate assessments for our operations.
- ❖ Our chemicals management is responsible and we work continuously to replace chemical products that are harmful to the environment and health with environmentally friendly alternatives.
- ❖ We constantly monitor chemical classifications and directives (Swedish law, REACH, RoHS and other EU Commission directives).
- ❖ We sort waste and endeavour to increase the proportion of recyclable waste in relation to combustible and hazardous waste.
- ❖ We manage hazardous waste in a safe and disciplined manner. We only use licensed suppliers for the disposal of hazardous waste.
- ❖ We review our environmental objectives and their impacts annually.
- ❖ We openly communicate our systematic environmental work.
